LAMTEC CMS training

Whether it be a standard industrial combustion or complex process application, LAMTEC's revolutionary CMS Burner Management System sets new standards in control automation.

The 3-day Combustion Management System (CMS) training focuses exclusively on this revolutionary burner and plant control system. CMS means "Combustion Made Simple".

Date: 24.-26.09.2024

Start/End: 08:30am /5:00pm

Content:

Scope of functions
-Comparison LAMTEC burner control ETAMATIC
-Remote Software
-Module management
-IO-Matrix
-GUI/UI
-Programming curves
-Digital inputs and outputs
-Analog inputs and outputs
-Setting parameters

Technical requirement:

- Laptop with Windows operating system
- Administrator rights to install drivers and software required for training.
- possibility to change IP address
- 2x free USB interface
- 1 free Ethernet interface (possibly via USB ethernet adapter)
